PROFILE

I am a frontend developer with experience working on personal and group projects. I enjoy creating accessible and user-friendly applications and websites. I like to share ideas and work as a team to produce more efficient results. Skilled at customer service, passionate about delivering excellent experience to customers and now looking to work with a team in a forward-thinking organization.

EDUCATION

Diploma, Software Engineering

AltSchool Africa - 2023

B.Sc. Human Anatomy

University of Ilorin, Nigeria - 2023

Diploma, Computer Science

Access Computer Academy - 2020

PROJECTS

GitHub Portfolio

A portfolio application that displays lists of repositories and details about them. Implemented vue routers, vue pagination and axios to fetch repositories from the Github API.

<https://github.com/oyin-systems/Github-repo>

Counter Application

A counter application built with VueJS, implementing the use of vuex for state management.

<https://github.com/oyin-systems/vue-counter>

Counter Application

Built a counter application making use of React useReducer, implementing combination of states.

<https://github.com/oyin-systems/altschool-examproject>

Calculator Application

Built a calculator application using React, thereby implementing useState hooks and other react hooks.
